

SETTING TRIP UNITS TO MILES OR KILOMETERS (KM) AND BIKE ID NUMBER

(Unless otherwise specified or requested at the time of purchase, the M3i trip distance is set to miles.)

NOTE: STEPS 1 THROUGH 7 MUST BE COMPLETED WITHIN 1 MINUTE

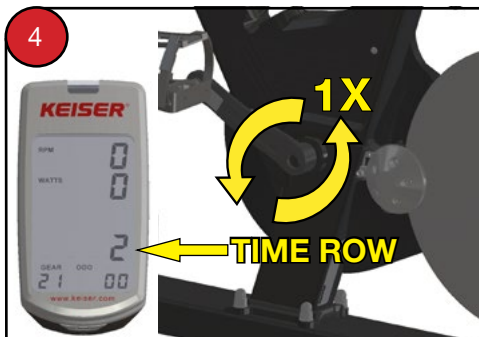

1
Begin with the bike off, push shift lever all the way down

2
Pedal 1 full revolution. The bike id (bid) in the screen above is 0, yours may be different. Also, notice the 1 in the "TIME ROW".

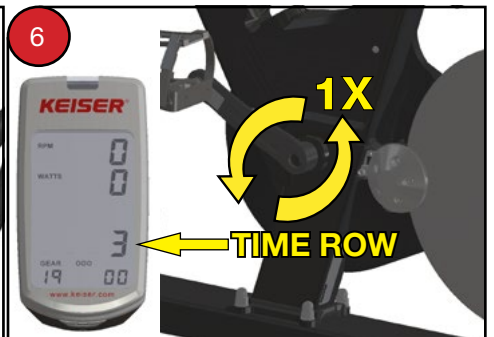

3
Set shift lever to gear 21 for Miles, or set shift lever to gear 19 for Kilometers.

4
Pedal 1 full revolution. Notice the 2 in the "TIME ROW".

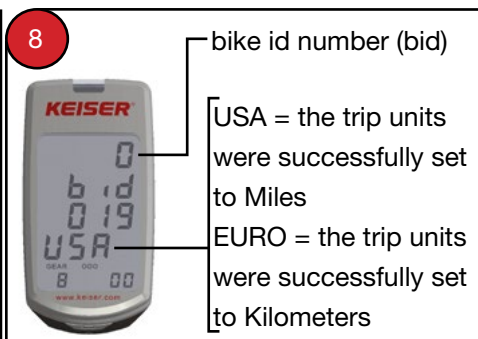

5
Set shift lever to gear 19 for Miles, or set shift lever to gear 21 for Kilometers.

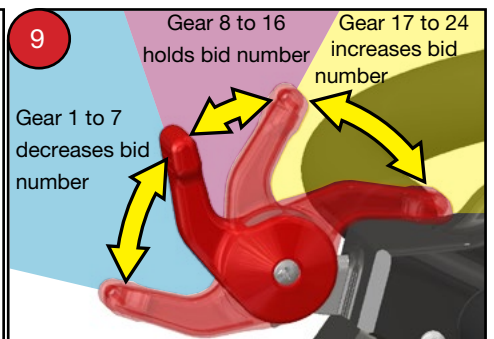

6
Pedal 1 full revolution. Notice the 3 in the "TIME ROW".

7
Move the shift lever from stop to stop 6 times.

8
Confirm the correct units have been set.

9
Once the trip units have been set, you have the opportunity to adjust the bike id number. Adjust the shift lever to attain the desired bike id number. Set the shift lever to any number between gear 8 and 16.

NOTE: The computer will only shut down while the shift lever is between gears 8 and 16.
