

# Installation of Performance Trainers

- Install on stud walls that have 16 inch centers
- Install on a permanent wall with 2" x 4" wood studs or a minimum 20 gauge steel studs
- Install on block walls filled with concrete
- Install on solid concrete walls
- Cannot be installed within 6 feet of any mirrors

## Note:

*If the facility does not ensure that the above requirements are met - upon installation, the installer will not install the Performance Trainers and the facility will still be responsible for the installation charges.*
